

## Protofab Engineering Unveils New **Class 10,000/ ISO 7 Cleanroom**

Blaine, MN October 6, 2009 Protofab Engineering recently unveiled the newest edition to their rapidly expanding facility—a **Class 10,000/ISO 7 Cleanroom**. This innovation was fueled by a growing number of requests from Protofab's customers. Eager to accommodate his customers, Protofab VP John Nelson says, "Continuously innovating our processes and service offerings is key to meeting the needs of our customers big and small. We're extremely excited about this new addition to our facility because it opens up a whole new market for us to explore." The addition of this cleanroom to Protofab's facility allows them to offer these extended services:

- The ability to work with customers to develop unique manufacturing and assembly processes.
- Medical Device Manufacturing
- Medical Device Assembly
- Cleanroom Inspection and Testing
- Cleanroom Packaging

### *About Protofab Engineering:*

Protofab Engineering is a dynamic Precision Machine Shop that takes pride in working with their customers from prototype to production. We specialize in supplying complex machined parts and weldments while holding tight tolerances with CNC Lathe, CNC Mill, and Wire EDM. We also provide Product Development and Engineering Support and recently added Inspection Services to our offerings.
