

## **Protofab Engineering Announces the Launch of New Website**

Blaine, MN January 13, 2010: Protofab Engineering, a leading provider of complex machined parts and weldments, announced the launch of their new website today. The URL will stay the same: [www.protofabengineering.com](http://www.protofabengineering.com), but with its new design, navigation, and easy quote form—Protofab is ready to take on all 2010 has in store. Protofab's Sales and Marketing Manager, Cassie Johnson, states, "We designed our new website to be as straightforward and user friendly as possible. Our new navigation is very clearcut and does a great job of showcasing our services as well as being an educational tool for website visitors. The new 'Easy Quote Form' is my favorite addition to the site; it makes getting a quote from us fast and painless." Displayed prominently on the home page are the extensive services Protofab Engineering offers, which allows visitors to easily pick and choose the services they are interested in.

The creation of this site was a joint effort between Protofab Engineering and First Scribe, a Minneapolis based web design company.

### **About Protofab Engineering:**

Protofab Engineering is a precision manufacturing company specializing in supplying complex machined parts and weldments. Our services include CNC milling, CNC turning, wire EDM, manual milling and turning, surface grinding, welding, and inspection. In addition, we offer Product Design, Development and Engineering Support. We aim to be a one stop shop that is able to help with the design, implementation, and manufacturing of your project in a timely and efficient manner to ensure your satisfaction. Our mission has always been to provide our customers with short lead times while maintaining superb quality and exceptional service.
